## Letter from the Conference Chair, Dr Jennifer Davies

The Advanced Pain Discovery Platform (APDP) held its third Annual Conference at the International Conference Centre Wales in Newport on Tuesday, 3<sup>rd</sup> June 2025. I would like to thank all participants for creating such a vibrant, dynamic and productive event.

It was an honour to Chair this conference. I would like to pay particular thanks to the Organising Committee, who were integral in the planning and delivery of the event. In the initial stages of planning, the Organising Committee was led by Professor David Walsh, APDP Director until his retirement in spring 2025. I would like to take this opportunity to recognise and thank Professor Walsh, both for his contributions to the planning of this event and his substantial contributions to the APDP since its inception.

APDP is a consortium-based UK network resource that is breaking through the complexity of pain and revealing new treatment approaches to address a wide spectrum of chronic and debilitating clinical conditions. It comprises experts in clinical and laboratory aspects of pain, psychologists, sociologists, and data specialists, linked to key academic and commercial facilities across the UK and beyond. At the heart of the APDP are people with lived experience of chronic pain, ensuring that together we meet their urgent needs.

The conference was an opportunity for the full range of our community to come together, and I am delighted that so many members were able to participate. The event featured 11 oral presentations and 35 poster presentations from across the APDP, covering a wide range of disciplines and topics all working to better understand mechanisms of pain and improve treatments. Fifteen poster presenters had the opportunity to 'pitch' their poster to audience in a rapid-fire format, and did a fantastic job of communicating their work *and* sticking within the 1-minute time limit – well done all!

I am particularly proud that we were able to provide bursaries to support 11 individuals to attend the conference, reducing barriers to participation that can be particularly problematic for academics early in their careers and our members with lived experience of pain.

This report records the spectrum of impressive achievements and insights that we were able to showcase at the Conference. We were enthused to see the vibrancy of the APDP community, and hope that this report reflects this energy.

A handwritten signature in black ink, appearing to read 'JD', with a long horizontal flourish extending to the right.

Dr Jennifer Davies

Chair of the third Annual Conference of the Advanced Pain Discovery Platform (APDP)

## SPEAKERS

**Professor Timothy Hales**, University of Dundee Mediators of the impact of early life adversity on pain

---

**Professor Stuart Bevan**, King's College London Antibodies and Post Covid Syndrome pain

---

**Professor Tony Pickering**, University of Bristol SenseCheQ: the feasibility of home QST for the detection of Chemotherapy-Induced Peripheral Neuropathy

---

**Professor Gary Macfarlane**, University of Aberdeen Reducing the burden of high impact chronic pain: the role of prevention

---

**Curie Freeborn**, APDP PPI Working Group Embedding Lived Experience into Pain Research: Working Group Recommendations

---

**Professor Danielle van der Windt**, Keele University Promises and pitfalls of using data from UK Biobank to investigate long-term transitions and causal pathways of high impact chronic pain (CHIPP)

---

**Professor Annina Schmid**, University of Oxford Factors predicting the transition from acute to persistent pain in people with 'sciatica': initial results from the FORECAST study

---

**Professor David Andersson**, King's College London Autoantibody-mediated chronic pain

---

**Dr Federico Dajas-Bailador**, University of Nottingham Local control of nociception: insights from axon-centric cellular models

---

**Dr Mohammad Al-Amri**, Cardiff University First Steps, Big Potential: What We have Learned So Far from Our Feasibility SPIN-VR Trial

---

**Professor Edmund Keogh**, University of Bath CRIISP - update on psychosocial factor in pain

---

## POSTERS

<p><b>Elise Ajay</b>, Rebecca Okubadejo, Anna Sales, Anthony E. Pickering, James P. Dunham</p> <p>University of Bristol</p>	<p>An experimental protocol for high-yield, single-unit resolution of the response to subcutaneous formalin in the rat saphenous nerve in vivo</p>

## Poster Prize Winners

Delegates were asked to vote for two separate poster prizes:

‘Science Quality’ – which poster describes research likely to have highest impact?

‘Science Communication’ prize – which poster is most clearly presented and understandable?

Congratulations to the winners:

Jessica Bates (Nottingham Trent University) won the Science Communication Prize for  
‘Immune driven changes to dorsal root ganglia environment in part drive  
chemotherapy-induced neuropathy onset’

Hollie Birkinshaw (University of Southampton) won the Science Quality Prize for:  
‘What constitutes validation and invalidation by clinicians in consultations for chronic  
pain? A qualitative exploration’

## Participant Feedback

We received feedback from 25 attendees, and were pleased to see that feedback indicates that the conference was well received, useful and enjoyable! Most of the respondents rated the usefulness of the APDP member presentations, usefulness of the poster session, and usefulness of the poster pitches 4 or 5 out of 5. Many expressed an appetite for the continuance of networking opportunities / another conference next year. There are also helpful comments and feedback that would be fed into any future event.

## Bursary Awardee Feedback

We offered the opportunity for early career researchers, including PhD students and post-doctoral researchers, and Public and Patient Involvement (PPI) APDP members to apply for a bursary. The bursary would pay up to £250 towards travel costs, car parking, and a single night's accommodation. In total, we paid bursaries to eleven individuals to support them in their attendance of this year's conference.

We invited feedback and the responses that we received strongly suggest that the bursary enabled participation where it may not otherwise have been possible.

".....for ECRs in particular, it means a greater likelihood that they can attend and specifically present their work which is key."

"Receiving support via travel bursaries enabled me to attend the conferences without worrying about whether I could afford to come....Generously covering train fare and hotel costs allowed me to travel in good time for the conference so I could attend all of the sessions each time, often including socialising with other attendees over breakfast or before the conference, making the absolute most of the opportunities."

"The bursary was useful since it allowed me to travel even for an encore poster"

"As a doctoral fellow, I found the APDP bursary extremely helpful. Without access to travel funds through my grant or institution, the bursary made it possible for me to attend this important meeting. It was a great opportunity to present my research, network with colleagues, and advance my academic career."

"The bursary provided equity to enable me access the same professional development, connections and networking opportunities available through the APDP conference and improved my ability to thrive."

## Conference Organising Committee

Thanks to all our committee members for making this a successful conference.

 <p>Dr Jennifer Davies, Cardiff University</p>	 <p>Prof. Michelle Briggs, University of Liverpool</p>	 <p>Jo Josh, PPI member</p>
 <p>Dr Bhushan Thakkar, University of Dundee</p>	 <p>Professor Gary Macfarlane, University of Aberdeen</p>	 <p>Curie Freeborn, PPI member</p>
 <p>Dr Andreas Themistocleous, University of Oxford</p>	 <p>Maureen Grossman, PPI member</p>	 <p>Debs Smith, PPI member</p>
 <p>Dr Milena De Felice, University of Sheffield</p>	 <p>Liz Dennis, Administrative Support, University of Nottingham</p>	 <p>Doris Chu, Administrative Support, University of Nottingham</p>
